Minimum:

OS: Windows 7/8/10 64-Bit

Processor: Intel Core i3 with 3.3 GHz or AMD Phenom II X4 with 3.2 GHz

Memo

English,French,German,Czech,Japanese,Polish,Russian,Simplified Chinese,Turkish,Korean

bus simulator 18 - official map extension

OK LET'S TALK ABOUT THE DLC ITSELF. FORGET ABOUT THE PRICE. I will give a positive feedback, though some glitches and bugs appear. Hope you guys could update and add more features in the future and make this game better. The extension does expand funs for players in some way. But what I want to say is the players may get bored and tired with the new update soon. Though we get two different new towns and an airport, they don't change a lot. Passengers from the airport are still the normal passengers model. The two new towns, however, seems just copy the buildings and rearrange them. Probably that's because you guys decide to create a sandbox map, just like GTA. I have to say it would be a great for exploring and customizing routes, but it also restricts the length of the routes if you can't provide a huge enough map for players. I'll just put suggestions and bugs in this review. May update in the future. I did a similar one in the main page but in Chinese. I hope this one could

express my ideas clearly. u4e2du6587u7248u7684u6d4bu8bc4u8bf7u53c2u8003u6e38u620fu672cu4f53u754cu9762u3002u7531u4e8eu4e2du6587u7248u8fd0u7528u4e86u5927u91cfu7f51u7edcu8bcdu8bedu548cu672cu571fu8bedu6cd5uff0cu4e3au9632u6b62u56e0u7ffbu8bd1u9020u6210u6b67u4e49u7279u6b64u66f4u65b0u4e00u7bc7u82f1u6587u6d4bu8bc4u3002

Suggestions for map: --The road inside the airport IS TOO NARROW. Long buses gonna have a tough time. I swear the road in front of my local DMV is even better than this. --Add traffic lights in some big junction instead of yield sign. The AIs are stupid. --Cancel the potholes punishment or increase the speed limits for passing through it. Suggestions for features: --MORE BUSES PLEASE. --Update the garage window. You may refer to the ATS garage window. -Insert-text function in customize menu. IT IS ANNOYED to adjust every decal to set fleet numbers. --Decals and ads can be used at the same time. --More NPC vehicles, such as emergency service vehicles. --Time cycle system. --Variety of numbers of passengers according to the time. Such as rush hour. --Please add more passengers, few passengers makes the 18m buses useless. --Improve the headlights of buses. BUGS: --A21, Urbanway 12/18m have serious texture problems. If the option "show skin on the window" remains NO, the current skin will be overlapped by the "bookworm" skin. --The official country skins DLC is no longer supported after the official update. You can't find these skins in your custom menu. --Even if players select "show skin on the window", the skin only shows in the preview window. In the actual game, the skin DOES NOT SHOW on the window. (Seriously?) --If you meet NPC bendy bus and it bends too much, the punish points will be added to you (even you're not driving a bendy bus, LOL) --Some NPC are slipping on the street, instead of walking. I only see this bug after the map update. --Rear LED signs on Setra buses may flash or disappear. --The passengers in front of the 4th door on A23 may get stuck and can't get off. Under this situation the fast-end function is disabled if you are at the last stop.. Fantastic DLC By a Fantastic Company 10/10 Highly recomend. The good: The map looks good and for the most part, plays pretty well from what I've seen so far. The bad: This map/update introduced numerous bugs into the game affecting player liveries, bus handling, buttons in the menus not working, you know, pretty basic stuff really. Not sure how these made it into the game, were they overlooked/ignored by the devs? I'm on the fence about recommending this DLC or not, I'm leaning towards a no until they decide to fix these basic issues.. Doesn't work on level 22. Only works on Sandbox mode.. Fantastic DLC By a Fantastic Company 10/10 Highly recomend. The good: The map looks good and for the most part, plays pretty well from what I've seen so far. The bad: This map/update introduced numerous bugs into the game affecting player liveries, bus handling, buttons in the menus not working, you know, pretty basic stuff really. Not sure how these made it into the game, were they overlooked/ignored by the devs?
