Glo is a simple yet challenging platforming game built a fairly unique mechanic: each and every level is shrouded in almost complete darkness. The only sources of light are your projectiles, your character, and the level exit. This lack of visual information lends itself to an initially slow-paced exploration of each level, looking for traps, enemies, and pitfalls. Death (and you will die) is a minor inconvenience, *instantaneously resetting you to the beginning of the level you are on. Given that the levels themselves are fairly small, the layout is soon memorized and you will find yourself zipping toward the exit with greater and greater speed and continuously making progress. The piecemeal story is revealed through writing on the wall and hidden memory fragments which were interesting enough to keep me moving forward.*

Pros:

- ***Challenging gameplay***
- ***Effective visual aesthetic***
- ***Interesting level design***
- ***Fair death mechanic***

Cons:

- ***Controls are quite slippery (at least with keyboard and mouse)***
- ***Some of the 100 levels are repeated with very little modification***
Glo is a rewarding little indie game that I recommend to all platformer fans.
